SUMMARY

Civil Engineering fresh graduate from Universitas Gadjah Mada with a strong focus on construction supervision, quality control, and field operations. Possesses a solid analytical foundation combined with practical exposure to verifying field execution against shop drawings and ensuring strict adherence to technical specifications. Gained valuable hands-on experience as an intern overseeing daily construction activities and managing progress documentation. Eager to leverage strong adaptability, problem-solving abilities, and project tracking skills to ensure smooth, timely, and safe project delivery.

EDUCATION

Universitas Gadjah Mada – Yogyakarta, Indonesia

Aug 2021 – Aug 2026

Bachelor of Civil Engineering, Concentration in Structural Engineering

- GPA 2.87/4.00

SMAN 78 Jakarta – Jakarta, Indonesia

Jul 2018 – Jul 2021

WORK EXPERIENCE

PT. ARSS Baru KSO PT. Intimulya Multi Kencana

Jan 2025 – Feb 2025

Site Supervisor Intern - Terban, Yogyakarta

- Assisted the site management team in overseeing daily construction activities for Proyek Revitalisasi Pasar Terban.
- Inspected concrete reinforcement, formwork installations, and casting processes to ensure work quality aligns with structural technical specifications and shop drawings.
- Monitored daily construction activities, gaining hands-on understanding of structural integrity and translating design elements into safe field execution.
- Documented daily progress and generated CAD outputs as a weekly progress summary for Revit integration.

PT. Bhineka Cipta Karya

Jan 2024 – Feb 2024

Drafter engineer - JABABEKA, Cikarang

- Shadowed engineering teams during field operations to observe structural quality control procedures, including soil testing and foundational works.
- Actively enhanced structural modeling and detailing capabilities through intensive practical training in Tekla Structures.

PROJECTS

Final Project/Thesis: Development of a Construction Project Monitoring and Delay Risk Detection System Based on the Integration of Excel VBA and Machine Learning

- Completed a thesis titled "PENGEMBANGAN SISTEM MONITORING DAN DETEKSI RISIKO KETERLAMBATAN PROYEK KONSTRUKSI BERBASIS INTEGRASI EXCEL VBA DAN MACHINE LEARNING", focusing on scheduling and machine learning implementation in Construction.

- Developed an early warning system to track work schedules and utilized S-curve analysis to evaluate and compare planned versus actual project progress.
- Demonstrated advanced computational programming skills (Python/VBA) through machine learning implementation.

Capstone Project: Sabo Dam Building Design

- Collaborated within a multidisciplinary engineering team to formulate a comprehensive, ready-to-build design for a Sabo Dam located on the Gendol River.
- Conducted rigorous structural calculations and stability analyses to ensure the structural integrity and safety of the dam.
- Designed the geometric dimensions and physical structural layout by integrating hydrological data and topographical site conditions.
- Executed complete 3D modeling and rendering, translating raw ground contour data into a detailed visual representation of the final structure.

ORGANIZATIONAL EXPERIENCE

Pelayanan Komputer Teknik Sipil dan Lingkungan FT UGM

Head of Technical Division

Dec 2023 – Jul 2024

Led the team in providing extracurricular civil engineering software training across all sub-disciplines. Drove cross-divisional collaboration to execute departmental events and organized internal upskilling to build a communicative, highly collaborative team.

Staff of Technical Division

Apr 2022 – Dec 2023

Collaborated with peers to deliver practical software training accommodating students' technical needs. Actively communicated across divisions to support joint events and participated in peer-to-peer training to enhance collective team capabilities.

Future Civil Engineering Challenge (FCEC) - Civil In Action (CIA UGM)

Dec 2021 – Nov 2022

Staff of Public Relation Division

Acted as the primary liaison between the organizing committee and educational institutions. Successfully executed nationwide outreach to invite high schools across Indonesia to participate in the FCEC paper competition, ensuring clear communication and smooth coordination with prospective participants.

SKILL

- **Technical Skills:** AutoCAD, SAP2000, Revit, SketchUp, Enscape, Python, Excel VBA, and Microsoft Office (Word, Excel, PowerPoint)
- **Languages:** Indonesian (Native), English
